

Since 1959, Gentec has been designing and manufacturing long-lasting, reliable, state-of-the-art electronics for the power and energy management sectors. The company has maintained its position as market leader thanks largely to its highly skilled employees and a commitment to customer satisfaction. In recent years, we have seen an increased number of US companies “offshoring” their Electronics Manufacturing to Canada. Working with Gentec is a great way for these companies to reduce costs without sacrificing quality. As proof that we make no compromise on quality, Gentec recently invested in a new MIRTEC MV-3 OMNI 3D AOI machine. The outstanding inspection capability of this system has resulted in a drastic reduction in manufacturing defect rates allowing us to pass on additional cost savings to our customers.” Christian Plourde, Operations Coordinator
