

PROTRONIX, INC.
ELECTRONIC ASSEMBLY AND MANUFACTURING

“Protronix, Inc. is a family-owned EMS provider specializing in low to medium-volume PCB manufacturing. As a long standing MIRTEC customer, we are very familiar with the quality of MIRTEC’s legacy 2D inspection equipment as well as their exceptional after sales support, so when it came to purchasing a new 3D AOI system, MIRTEC was the obvious choice. Protronix recently purchased an MV-3 OMNI Desktop 3D AOI and the results have far exceeded our expectations. Our MV-3 OMNI has performed exceptionally well detecting lifted leads, coplanarity issues, solder bridges and insufficient solder joint defects. MIRTEC’s Award-Winning OMNI-VISION 3D Inspection Technology has virtually eliminated countless hours of manual inspection work allowing us to achieve higher production quality in a shorter amount of time.” – Don Rosadini, Owner

- ▶ OMNI-VISION® 12 Projection Digital 3D Moiré Technology
- ▶ Exclusive 25 Mega Pixel CoaXPress Camera System
- ▶ 10 um Telecentric Compound Lens Design
- ▶ Eight Phase COLOR Lighting System
- ▶ 18 Meg Pixel SIDE-VIEWER® Camera System
- ▶ Programmable Z-Axis Multi-Focus System
- ▶ INTELLI-PRO® Automatic Programming Software
- ▶ Multi-Functional AOI-SPI Fusion Technology
